

RASHMITHA CHALLA

chrashmi2026@gmail.com | +91-9121748210 | GitHub | LinkedIn

SUMMARY

Computer Science undergraduate with experience in building AI-driven applications using LLMs, RAG pipelines, NLP, and computer vision. Developed projects including a RAG-based document chatbot and intelligent video analysis systems using Python and modern AI tools. Enthusiastic in applying Generative AI and intelligent systems to solve real-world problems through practical, research-oriented approaches. Strong collaborative mindset with good communication and adaptability in team environments.

EDUCATION

Degree/Certificate	Institute	Year
B.Tech.	Indian Institute of Information Technology, SriCity	2022-2026

INTERNSHIP EXPERIENCE

- INTERN – Sutherland Global Services** May 2025 - Jul 2025
AI Chatbot with Document Upload and LLM-based Q&A [GitHub Link](#)
 - Developed an **AI-powered chatbot** that accepts documents (PDF, DOCX, TXT), extracts content, and answers user queries contextually using a **Retrieval-Augmented Generation (RAG)** workflow.
 - Implemented text extraction, chunking, and embeddings with **SentenceTransformers (all-MiniLM-L6-v2)**; stored embeddings in a temporary vector store and retrieved top-matching chunks for queries.
 - Integrated **Ollama LLaMA 3.2** model for generating context-aware responses from relevant document sections.
 - Built a **React + Tailwind CSS** frontend for file upload and chat interface, connected via a **FastAPI** backend.

PROJECTS

- AI GENERATED QUIZ** Live Demo
Technologies: React Js, Gemini API
 - Built an AI-driven quiz platform that dynamically generates personalized questions based on user-selected topics.
 - Improved user engagement by enabling instant quiz creation without manual input.
 - Implemented robust API integration with **gemini-2.5-flash**.
 - Used **Loveable AI** for Glassmorphism styling and **deployed via Vercel** with CI/CD pipeline.
- PERFORMANCE ANALYSIS OF ATHLETES FROM TRAINING VIDEOS**
Technologies: OpenCV, MediaPipe, Python
 - Built an **AI-driven system** to analyze human balance and posture through webcam using **computer vision techniques**.
 - Implemented 4 balance assessment tests with **automated analysis** and edge-case handling for reliable performance across different user conditions.
 - Used **Python** for **data processing, feature extraction, and performance analysis** to generate meaningful movement insights.
 - Researched** and applied **suitable computer vision and analysis techniques** to improve accuracy and consistency of posture evaluation.
- E-COMMERCE DELIVERY PERFORMANCE ANALYSIS** Github Link
Technologies: SQL, Python, Power BI
 - Collected and modified** e-commerce delivery datasets to analyze delivery performance and customer trends.
 - Wrote **SQL queries** using joins, aggregations, and filtering to calculate **key business metrics** and generate insights.
 - Used **Python and pandas** for data cleaning, preprocessing, and analysis.
 - Built interactive dashboards in **Power BI** to visualize delivery trends and performance metrics.

TECHNICAL SKILLS

- Programming:** Python, MySQL, C, Java
- AI & GenAI:** LLMs, RAG Pipelines, Prompt Engineering, Computer Vision, Basic Machine Learning
- Frameworks & Libraries:** LangChain, SentenceTransformers, Pandas, NumPy, Matplotlib, MediaPipe, OpenCV
- Web Technologies:** FastAPI, Node.js, Express.js, REST APIs, HTML, CSS, React.js
- Soft Skills:** Problem Solving, Communication, Presentation Skills, Team Collaboration

PUBLICATIONS

- ROBUST-VIBES: A Robust System for Virtual Human Balance and Uprightness Evaluation**
(Accepted at AICSET'25, Marrakech, Morocco)
 - Proposed a computer vision framework using MediaPipe and OpenCV to enhance the Flamingo Balance Test, achieving 92% accuracy in real-time human balance assessment with applications in sports, rehabilitation, and fall-risk evaluation.

POSITIONS OF RESPONSIBILITY

- **Team Lead – Dance Club**

Indian Institute of Information Technology, Sri City (Present)

- Managed choreography, event planning, and performances for cultural fests and competitions.

- **Planning Team Lead – NSS**

Indian Institute of Information Technology, Sri City (2023–2025)

- Organized outreach programs, blood donation camps, and awareness drives.

- **GDG(Google Development Group) Club Member**

Indian Institute of Information Technology, Sri City (2023)

- Participated in regular club contests, sessions and workshops.
